

Additional Details

There are some parts of this game which we did not initially present but later, we went a little ahead to add some additional elements.

- Initially, we decided on having only 8-10 levels, but the game now has 11 levels, an introductory screen and a final screen.
- We have created most of the sprites in this game by ourselves using 'Piskel' (<https://www.piskelapp.com/>). They have not been used from the internet. These include the following sprites: Faiza, clock, pop quiz, assignment, anxiety, brain, Jake (the dog representing parties) and the 4.0 GPA. All these piskel files have been added to a folder within the main folder.
- Initially, we did not plan on implementing a parallax background, but since this was relevant to some of the levels, we implemented that too.
- The background created using Canva was not suitable to work as a parallax background, and so it required some additional photo-editing which was done to implement the parallax background.

Acknowledgements and Credits

- The backgrounds in this game have been created using Canva (canva.com).
- The sprites which we did not create ourselves (Facebook, Instagram etc.) were downloaded from pngfind.com.
- The two songs used in this game are
 - 1) <https://www.youtube.com/watch?v=NNYl8VbFyY>
 - 2) <https://www.youtube.com/watch?v=m2JRghbgeYw> (00:00:02 – 00:00:27)
